

Game Title: Quest Game

This game is a project based on the idea of creating an interactive game where players complete missions by interacting with objects. The concept is completing tasks accordingly to defeating enemies under time constraints. Also, Players must move through different levels, interact with objects, and defeat enemies to progress.

Audience:

The game is designed for individuals who enjoy interacting with objects and elements in a game, especially those who have a preference for medieval themes.

Style:

The game features character designs and objects that are based on a medieval theme. I used the environment with items such as swords, enemies, and goals

Conclusion:

It is a fun game and interactive. Overall, the gameplay gives you challenges / difficulties, object interaction, and by managing the time. By completing the levels, the player feels a sense of accomplishment, making the game both entertaining and rewarding.
